Tools for success

"We were bowled over by the amount of love and pride people have for their tool collections. XP1000 has been a big investment for us, but we're confident there is a lot to love about it. It's a quality range that we know will work as hard as electricians do."

Phil Rowley, Sales Director at Draper Tools

80% of electricians enjoy what they do

Why? Tools of the trade play a big part

The best things about the job, according to the nation's electricians:

- They get a buzz out of problem-solving and getting to use tools every day.
- Around one in six even admitted they get a sense of satisfaction from simply sitting back and admiring their tools.
- A quarter of the electricians surveyed said they love adding to their tool collection.

A good-looking range to drive great sales...

The expert-quality patented dual-layer insulated sheath makes any damage highly visible. Individually tested to 10,000V, this range is suitable for working on live circuits of 1,000V AC and 1,500V DC. The ergonomic soft grip bi-material handle allows free spinning in the palm of your hand to quickly tighten screws but allows transfer of torque when needed. The flat side design prevents them from rolling.

The handle can also be fitted with SCVM steel blades, which are hardened, tempered and chemically blackened with a precision-machined tip for an exact fit to prevent screw damage. For peace of mind when working at height, the handle can also be fitted with a tethering solution through the hole provided.

Let's get out there...

We know it takes more than a merchandiser to sell tools, which is why we are supporting this launch with advertising in all the major industry titles from *Professional Electrician* to the NICEIC's *Connections* magazine and more.

Look forward to seeing head-turning, demand-generating activity across print, email and social media. Plus some of Instagram's most influential electricians are putting these tools to the test.

There's even all-new, eye-catching photography, giveaways and a fresh landing page on the Draper website too.

EST. 2004 MAGAZINE

Loved by electricians

Don't just take our word for it...

"Solid, robust and certainly trustworthy, the interchange screwdriver range was fantastic, ESPECIALLY the rotating base where the screwdriver sits in your palm."

Anonymous Electrician

"Standout sleek ergonomic design."

@jay_the_spark - Electrician

"I trust the XP1000 tethered pliers while working at height. The wrist strap and lanyard was safe and convenient to use."

@tee_electrics - Electrical Apprentice

"Vibrant, robust, balanced and portable."

@big_ash_electrics - Electrician

"I like the feel and look of the XP1000 range. They are comfortable and lightweight and feel quite natural in the hand. Not clunky."

@alex_sparky - LED Installer & Trainee Electrician
